As a PC user, I feel that the witchhunt that you have going on with Microsoft needs to be ended. Since I am a PC user, I do not feel that any harm has come to me by way of Microsoft. You are putting a burden on a company who has been able to use its abilities to move forward in the field. This is the entire concept of marketing what you do best. If the competitors of Microsoft can't do as well, that is not the fault of Microsoft. The best company will keep moving into first place. Why is the government trying to put their hands into this? Please leave Microsoft alone!

Elaine Whitehouse
